PROFESSIONAL SUMMARY

Junior Software Engineer experienced in developing scalable full-stack SaaS platforms, workflow automation systems and backend financial applications. Skilled in building secure REST APIs, authentication workflows and database-driven architectures in collaborative startup environments. Focused on delivering efficient product solutions and improving system performance.

EXPERIENCE

Software Developer Intern — Aldeas Tech Solution

Jan 2026 – Present

Working on AI-driven platforms supporting automation workflows, digital learning operations and financial transaction processing systems.

SMM Aldeas — AI Social Media Automation Platform

Key Contributions

- Developed AI-based automation workflows enabling multi-platform content publishing, reducing manual content creation effort by nearly 85%.
- Implemented scheduling and analytics modules improving campaign monitoring efficiency and engagement visibility.
- Strengthened backend security by integrating authentication middle ware and optimizing REST API request handling.

Technologies Used

- React.js
- Node.js
- Express.js
- PostgreSQL
- Google Gemini API
- OAuth Integration
- JWT Authentication
- Data Visualization Libraries

AlDeas Academy — Learning Management System

Key Contributions

- Built modular LMS architecture supporting multi-role academic work flows, improving structured course delivery operations.
- Developed secure REST APIs enabling real-time enrollment processing and protected session content access.
- Designed scalable relational database schema enhancing data consistency and administrative efficiency.

Technologies Used

- Next.js
- TypeScript
- Node.js
- Express.js
- PostgreSQL
- Drizzle ORM
- JWT Authorization
- RBAC Security

Product-Based MLM & ROI Platform — Backend Financial System

Key Contributions

- Supported backend investment lifecycle workflows including automated ROI scheduling and referral income distribution logic.
- Validated wallet ledger transactions ensuring accurate balance computation and secure withdrawal processing.
- Documented cron-based automation architecture improving maintainability of financial processing systems.

Technologies / Exposure

- Node.js
- TypeScript
- Express.js
- PostgreSQL
- Redis
- Razorpay Integration
- JWT Authentication
- Financial Ledger Architecture

INTERNSHIP EXPERIENCE

Full Stack Developer Intern — 24hr7 Commerce Pvt. Ltd.

Apr 2025 Sep 2025

- Developed MERN-based modules improving application performance and feature delivery in startup product releases.
- Integrated REST APIs and MySQL database operations supporting real-time data processing workflows.

Web Developer Intern — Habib IT Solutions

Dec 2022 Mar 2023

- Built responsive UI components enhancing cross-device usability and frontend interaction quality.
- Assisted backend integration tasks and version control workflows using Git and GitHub.

Salesforce Developer Virtual Intern

Aug 2022 Oct 2022

- Practiced CRM workflow automation and debugging concepts improving process understanding and technical problem solving.

TECHNICAL SKILLS

Frontend: React.js, Next.js, Three.js JavaScript, TypeScript, HTML5, CSS3, Tailwind CSS

Backend: Node.js, Express.js, Django, Python, REST API Development

Database: PostgreSQL, MySQL, MongoDB

ORM / Data Layer: Drizzle ORM, Django ORM

Concepts: SaaS Architecture, Authentication & Authorization, RBAC Security, Workflow Automation, Database Schema Design

Tools: Git, GitHub, VS Code

EDUCATION

St. Joseph's Degree College

2021 - 2023

Bachelor of Science (MPC)

CGPA: 8.0 / 10

CERTIFICATIONS

- Full Stack MERN Development 10000 Coders
- Python Certification Habib IT Solutions
- Salesforce Certification Smart Interns
